Halogen Headlight

by **Wehmerlite**

A versatile new headlight for use in the examination room or the operating room.

Brilliance - Target illumination remains constant at 2,000 footcandles for life of lamp. Approaches fiber-optic brilliance without the confining cable. 100 hour life.

Co-planar Illumination - The mounting system and integral mirror allows positioning between your eyes to minimize shadows in deep cavities.

Spot Size Change - Continuously variable from 7.5cm to 1.2cm micro-spot (at 13" distance). Uniform round spot minimizes reflective glare in small cavities.

Automatic Switch - Tilt the headlight out of your way and the light goes off. This eliminates reaching and reduces heat, build-up, increases bulb and battery life.

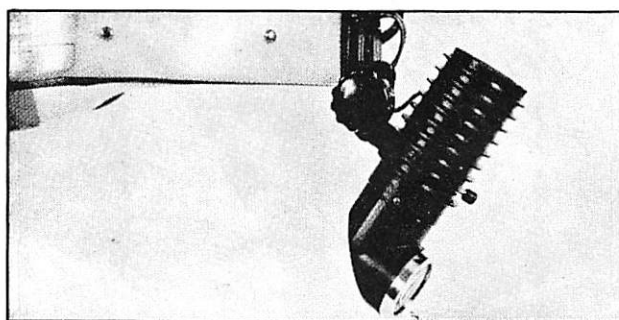

Comfort - Low overhung weight due to the mirror system and use of light materials. And a padded headband with click-stop adjustment.

Battery or Transformer Operation - A shirt pocket rechargeable battery will last 35 minutes in continuous operation, 45 minutes in intermittent use.

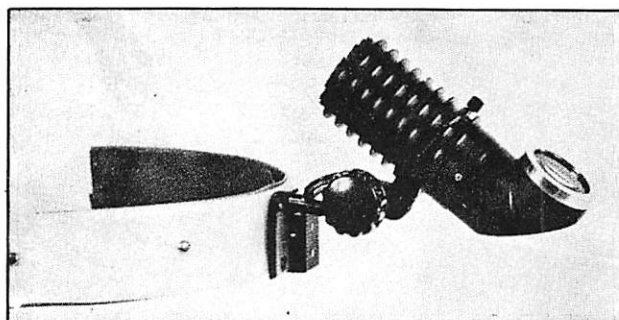

A heavy duty battery pack which is belt worn is also available giving 2½ to 3 hours continuous use. If used intermittently as in your office, the H.D. battery should last all day. Both batteries recharge overnight.

98-1000	Headlight with headband and wall hanger	\$335.00
98-1001	Transformer 120V 50-60Hz.....	45.00
98-1002	Monocular eyepiece.....	130.00
98-1004	Battery Pack Lightweight	115.00
98-1005	Charger for Lightweight Battery.....	40.00
98-1010	Replacement halogen lamp.....	12.00
98-1011	Storage and carrying case	105.00
98-1012	Battery Pack Heavy Duty	195.00
98-1013	Charger for H.D. battery	55.00
